

The Effect of Emotion Goal Pursuits

Faculty: Dr. Iris Mauss
Researcher: Phoebe Lam
Contact email: phobelam@berkeley.edu
Location: Tolman 4209
Position Available: Spring 2014
Lab Website: www.ocf.berkeley.edu/~eerlab

Description of research: This project focuses on the ways people regulate their emotions to achieve their emotion goals (e.g., goal to be happy). This assistantship would be a good fit for individuals who wish to learn more about social/personality research methods. This experience would also help develop research skills necessary for applying graduate school.

Description of student responsibilities:

Depending on the applicant's interests and research background, responsibilities may include:

- Scheduling laboratory based experimental sessions
- Transcribing audio data
- Coding open-ended video data
- Preparing experimental materials

Commitment: Approximately **5-10** hours a week for at least **one semester**. Training would begin mid to late September. Course credit (99/199) available.

Requirements: Must have taken Psych 1. Previous research experience not required.

To apply for the position, please email the following to phobelam@berkeley.edu:

1. Completed Application Form (available on lab website)
2. Curriculum Vitae
